Project Overview

Tell us a little about your project. What are the main objectives of the project, and who will benefit from it?

The Nigerian Water Project has the following shared goals.

- a. Provide access to a reliable water source via a solar powered borehole well and pump.
- b. Purify the borehole well water to make it safe to use in the community.
- c. Distribute the purified water for the benefit of the community.
- d. Establish a water committee and a Rotary Community Corporation to develop a business plan to manage operation of the project and distribution of the water.
- e. Educate the water committee on well and purification system operation and maintenance to ensure sustainable access to clean/safe water for the future.
- f. Educate the community on the importance of clean/safe water and its uses in the community.
- g. Promote the project beyond the local community to recognize Rotary and the meaning of international service.

Members of the Ajaba community will be the primary benefactors from the project. The project will also benefit both Rotary Clubs and their commitment to service in their communities and beyond.

Do any committee members have a potential conflict of interest related to a cooperating organization?

No

Why did you choose to partner with this organization and what will its role be?

Living Waters for the World has a proven record of success with water mission projects. Their health and hygiene education is outstanding.

Partners (Optional)

List any other partners that will participate in this project.

The Rotary Community Corps of the community of Ajaba is in the process of being established. This organization will take over long term management of the project after the project is completed.

Volunteer Travelers (Optional)

A grant for a humanitarian project can pay for travel for up to two people who will provide training or help implement the project if the necessary skills are not available locally. Upload a CV for each volunteer traveler. Do not include sensitive personal data, such as government ID numbers, religion, race, health information, etc. You are responsible for informing volunteer travelers of the personal data you have provided about him/her to Rotary and that it will be processed in accordance with Rotary's [Privacy Policy](#).

No.	Name	Email
1	Joseph Gar	jdoogar@gmail.com

Briefly explain why these individual(s) were selected and how they are qualified to provide skills that are not available locally.

Joseph Gar is the uncle of Benjamin Gar, President of the Rotary Club of Makurdi. Joseph grew up in Nigeria and immigrated to the US in 1982. He has earned his PhD and currently teaches at the West Kentucky Community and Technical College, Paducah campus.

Describe this person's role in the project.

Joseph is a member of the Rotary Club of Paducah and is the key interface with the Rotary Club of Makurdi. As an educator, he will be reviewing all training materials and programs for community education associated with the project. The success of this project will be based on relationships among the teams and Joseph's family ties to the community and Nigeria. These relationships will provide the foundation for a successful project that will benefit the communities immeasurably.

Host sponsor confirmation of volunteer travelers

I confirm that the host club or district has extended a travel invitation, fully supports and approves volunteer traveler(s), and verifies that the international travel to the club and/or district is needed to implement the project.

Rotarian Participants

Describe the roles and responsibilities that the host and international sponsors will have in this project. Please be specific. Which sponsor will receive and manage the grant funds?

The Rotary Club of Paducah will receive and manage the grant funds. The Rotary Club of Makurdi will receive and process invoices from local vendors and pass them along to the International Sponsor for payment directly or through the Host Partner.

The Host Club will manage the interactions with the technical providers for the project including engineering and other technical resources. The Host Club will coordinate all community training for the project including technical training on the equipment and community health and hygiene training.

The International Partner will manage the grant funds and budget in collaboration with the Host Club. All interactions and training with Living Waters for the World will be managed and coordinated through the International Club. See the MOU for more specifics.

Describe how the partnership between the host and international sponsors was formed. What agreement have the sponsors made toward ensuring that the project will be implemented successfully? How will they manage any challenges that arise throughout the project?

The partnership between the Host and International Clubs was based on the family relationship between Benjamin Gar and his uncle Joseph Gar. Both are Rotarians and both are committed to doing international service work to benefit their communities in the world. Living Waters for the World provides a framework for connecting communities dedicated to providing access to clean/safe water. Both clubs will be using that framework and model to establish the relationship and keep it sustainable.

Project planning

Describe the community needs that your project will address.

This project will primarily address the community's lack of access to safe water for drinking, cooking, and other hygiene needs. This project will also reinforce the community's awareness and education about the uses of clean water to sustain this vital resource.

How did your project team identify these needs?

A community assessment was done by the Rotary Club of Makurdi in the Benue State of Nigeria. A copy of it is attached.

How were members of the benefiting community involved in finding solutions?

The community assessment process was done by having community meetings to get feedback from everyone in the community from leaders to children.

How were community members involved in planning the project?

Community members attended assessment meetings and met with Rotarians who conducted the assessment.

Project implementation

Summarize each step of your project's implementation.

Do not include sensitive personal data, such as government ID numbers, religion, race, health information, etc. If you include personal data, you are responsible for informing those whose personal data is included that you are providing it to Rotary and that it will be processed in accordance with Rotary's [Privacy Policy](#).

8	Oversee all contractor activities to purchase equipment, ensure the security of the equipment, and install it on the site.	6 months
9	Drill the well after the Global Grant has been approved, then evaluate the quality of the well water to determine the appropriate purification technology.	3 months
10	Start the education of the community after the well is drilled, then start on construction of the purification system when the quality of the water is determined.	3 months

Will you work in coordination with any related initiatives in the community?

No

Please explain. Are local initiatives not addressing these needs? Or, if they are, why did you decide not to work with them?

We are not aware of any local initiatives in the community. This will be a groundbreaking project to establish health and hygiene education in the community and school.

Please describe the training, community outreach, or educational programs this project will include.

This Global Grant project will provide technical training for the operators of the well. This will include financial training on the recordkeeping to make the project sustainable. This project will also include community education about the importance of clean water and

good hygiene practices such as hand washing. The project will also include training for the Rotary Community Corps to continue operation of the project after it is completed. This will be done by the Rotary Club of Makurdi and their Service Project Committee.

How were these needs identified?

These needs were identified in the community assessment and from the advice of Rotary WASH ambassadors.

What incentives (for example, monetary compensation, awards, certification, or publicity), will you use, if any, to encourage community members to participate in the project?

The sale of water will involve reduced pricing for individuals or families that subscribe to clean water access through a "bottle exchange" program. Purified water will also be available at the neighboring school and church for free. Non-subscribers will pay full price for bottled water. Details will be determined by the Rotary Community Corps and their leaders.

List any community members or community groups that will oversee the continuation of the project after grant-funded activities conclude.

The project will be managed and overseen by a Rotary Community Corps that will be established by the Rotary Club of Makurdi.

Budget

Will you purchase budget items from local vendors?

Yes

Explain the process you used to select vendors.

The Rotary Club of Makurdi evaluated local contractors that provide technical services, equipment, and training in the area. The Telland Limited Nigeria contractor has successfully installed other borehole wells in the area and was selected as the contractor for this project.

Did you use competitive bidding to select vendors?

No

Please explain.

The Rotary Club of Makurdi and its members have developed a relationship with Telland Limited Nigeria and decided that it would be best to deal with a contractor they knew and trusted. Telland Limited Nigeria will be the primary contractor and manage sub-contractors that will provide specialized services and materials.

Please provide an operations and maintenance plan for the equipment or materials you anticipate purchasing for this project. This plan should include who will operate and maintain the equipment and how they will be trained.

See the attached plan and budget for details on the materials.

Describe how community members will maintain the equipment after grant-funded activities conclude. Will replacement parts be available?

The operations plan developed includes setting funds aside for long term maintenance and parts replacement.

If the grant will be used to purchase any equipment, will the equipment be culturally appropriate and conform to the community's technology standards?

Yes

Please explain.

Telland Limited Nigeria has installed many wells in the region and will be using locally sourced materials, labor, and services.

After the project is completed, who will own the items purchased by grant funds? No items may be owned by a Rotary district, club, or member.

The Rotary Community Corps of Ajaba will be the owner and operator of the equipment after the project is complete. The Rotary Club of Makurdi is in the process of establishing this Rotary Community Corps per the guidelines of The Rotary Foundation.

Funding

Does your project involve microcredit activities?

Have you found a local funding source to sustain project outcomes for the long term?

Yes

Please describe this funding source.

The Rotary Community Corps will accept community donations for continued operation. They will not be dependent on funds from the Rotary Club of Makurdi.

Will any part of the project generate income for ongoing project funding? If yes, please explain.

Yes, the business and operations plan specifies that water will be sold in the community to generate income for the project. The final business and operations plan will be adopted by the Rotary Community Corps.
